

# TRAVIS COUNTY WATER CONTROL AND IMPROVEMENT DISTRICT 17

3812 Eck Lane • Austin, Texas 78734  
• Phone (512) 266-1111 • Fax (512) 266-2790

## Plumbing Inspection Guidelines

These requirements are not all inclusive. Please refer to the Uniform Plumbing Code, 2021 edition and local amendments for additional information.

### Six Inspections Required

- 1. Rough In:** Drains, waste, vents are supported and in place. Tests on and ready to be verified. All pipes and fittings are to be exposed for visual inspection. If a building permit is required, a building layout is required prior to this inspection request.
- 2. PVC Wrap:** prior to concrete pour (pre-pour)
- 3. Copper:** Lines in place and protected with no joints in the slab.
- 4. Top-out:** All pipes are in place, supports connected, vent takeoffs and trap arms are completed, water heater, water, sewer, and gas lines (natural gas) are in place and ready for inspection.
- 5. Yardline:** See attached Yardline form.
- 6. Final:** All valves and fixtures installed, all vents completed and protected from ultraviolet rays. Water system tested. Gas pipes connected and tested. Septic or sewer connected. Combustion air supply to all gas fired appliances.
